

## RENODECO WALL CLADDING

# Creative wall cladding

## RENODECO

Set accents and create a whole new atmosphere in your bathroom. RenoDeco, the seamless wall cladding for an extraordinary bathroom design in partial renovations and new builds.

## What is RenoDeco?

### OUTSTANDING

**Ideal wall cladding material**  
for partial bathroom renovation

**3 mm thick aluminium composite panel**  
with one-sided direct print using sustainable  
organic inks as well as an additional high-quality  
surface finish

**Hard-wearing surface finish**  
with high-quality textured surfaces, elegant  
high-gloss lacquers or velvety silk-matt surfaces

**Hygienically seamless wall design**  
easy to clean, scratch-proof, food-safe, colour-stable  
and therefore beautiful in the long term

**Wide range of decors**  
for customised bathroom design  
(see page 28 – 49)

**Processing and installation directly on site**  
with standard tools –  
without dirty tiling work

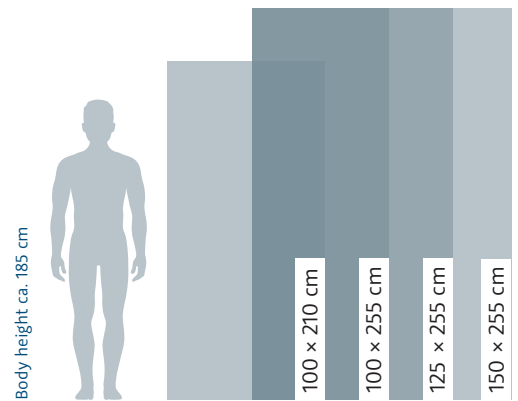

**Quick cladding of large wall areas**  
thanks to large-format panels

### RenoDeco decorative panels

The practical RenoDeco decor panels enable a quick, easy and, above all, homogeneous cladding of wall surfaces. RenoDeco not only impresses with its high-quality look, but also with its hygienic characteristics. Thanks to the large format panels in sizes 100 × 210 cm, 100 × 255 cm, 125 × 255 cm and 150 × 255 cm, an almost seamless surface can be created. The water and scratch-proof material and the true-to-colour surface finish also prevents dirt, mould and limescale from settling. The hard-wearing surface also makes it easy to clean: conventional cleaning products and a soft cloth are all you need to clean RenoDeco.

## HIGH-GRADE, RUGGED LAYERED STRUCTURE THANKS TO SURFACE FINISH

### 7. Surface finish (\*only with textured decors)

Offers striking embossing of natural materials for a genuine tactile experience

### 6. Top coating

Hard-wearing top paint coating for a perfect surface finish

\*\* High-gloss and silk-matt finishes are composed of two highly abrasion-resistant paint layers

### 5. Basecoat

Highly abrasion-resistant paint coating

\*\* High-gloss and silk-matt finishes are composed of three highly abrasion-resistant paint layers

### 4. Digital print

Six-colour printing for motives that tell a story

### 3. Primer

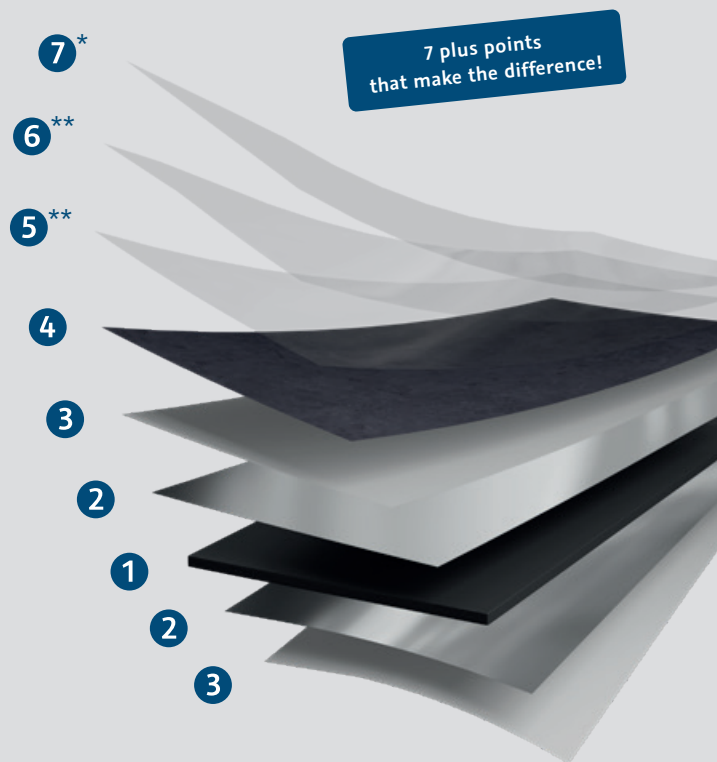

The job of the primer is to maximise the colour display and enable optimum adhesion.

### 2. Aluminium cover layer

HSK uses a high-quality, 0,3 mm aluminium cover layer instead of the commonly used 0,15 - 0,2 mm aluminium cover layers

### 1. Panel core

The core is made of premium LDPE polyethylene

**Delivery times:** The delivery lead time for UK stocked decors is two to three days, Germany stocked panels two to four weeks, Individual print decors can take four to six weeks from motive approval.

**Colour deviations:** For technical printing reasons, the printout of the decors in this print document may differ slightly in colour from the original colours of the decor panels. This does not constitute grounds for complaint.

Due to the manufacturing process, there may be colour deviations between the sales sample and the decor panel supplied. The lighting situation (type and angle of lighting, as well as the incidence and amount of daylight) has a significant influence on the colour rendering of the decor. In any case, the decor supplied must be agreed with the client before installation.

**Individual printing:** When mounting in alignment, the panels are trimmed down by 5 mm on each side (= 10 mm in width and height). Therefore final dimensions are 990 × 2.540 mm instead of 1.000 × 2.550 mm or 1.490 × 2.540 mm instead of 1.500 × 2.550 mm.

The dimensions of all other decors are subject to a manufacturing tolerance of ± 4 mm.

## Quick and easy

### **RenoDeco brings individuality and cosiness to your bathroom**

White bathrooms are timeless, but can become monotonous after a few years. In addition to a visual upgrade, RenoDeco also brings practical benefits to the bathroom.

Wall coverings such as plaster are primarily decorative. Ideally, they should not only be decorative but also functional. RenoDeco was specially developed for renovations and reliably covers outdated or incomplete wall surfaces. With beautiful looks and extremely practical characteristics.

## Inspirations

### Furnishing trends for more creativity

A colourful family bathroom, cosiness, an urban atmosphere, a romantic oasis of well-being for bathrooms for two, natural flair or for fans of minimalist designs: with RenoDeco, wall surfaces can be designed to suit any preference and any lifestyle. The high-quality decor panels are finished using a special process that enhances the realistic effect of the respective decor.

## The finishing touch

### Silk-matt, high-gloss, textured

RenoDeco not only impresses with its individual, fresh look, but also with its hygienic properties. The water- and scratch-resistant material and the high-quality surface finish also prevent dirt, mould and limescale from settling. Depending on the style and furnishings, you can choose between the three surfaces. Alternatively, they can be combined just as beautifully and effectively.

### Benefits

- Various designs with textured, high-gloss or silk-matt surfaces
- Four panel formats available to provide seamless cladding of larger wall surfaces in the blink of an eye
- Robust, classy surface finish for a long life
- 3 mm material thickness – requires very little additional wall texture
- Ample decor range with stone, wood, concrete, fine plaster, metal, tile, and uni-decors, plus custom prints with custom photos or motives out of the HSK image database
- Straightforward, easy to clean
- Can be worked and installed directly on site with standard tools

### Properties

- Hygienically seamless, easy maintenance, water-resistant
- Durable, resistant and scratch-proof
- Colour-stable, food-safe and temperature-resistant up to +80°C
- Lightweight: 3.8 kg/m<sup>2</sup>
- Fire category B2 according to DIN 4102-1
- A+ classification according to French regulations for VOC emissions (emission-free)
- Perfect imitation of natural materials (stone, wood, etc.) thanks to tactile, textured surfaces
- Shaped design for manual edging of creative wall cladding with textured surface

Video  
Perfecte hygiene

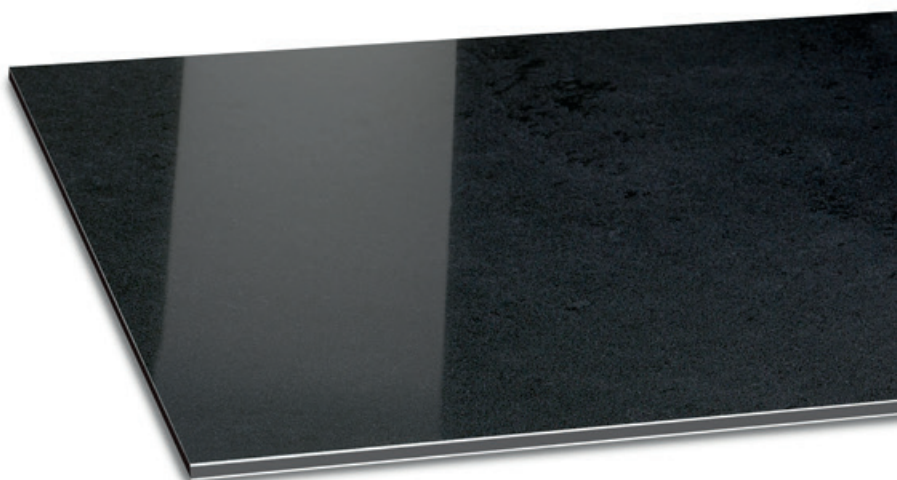

## SILK-MATT

The silk-matt surface with its velvety, soft feel and silky shimmer achieves a special exclusivity in the bathroom. The unique surface stands out with its practical anti-fingerprint effect and is free from reflections or mirroring.

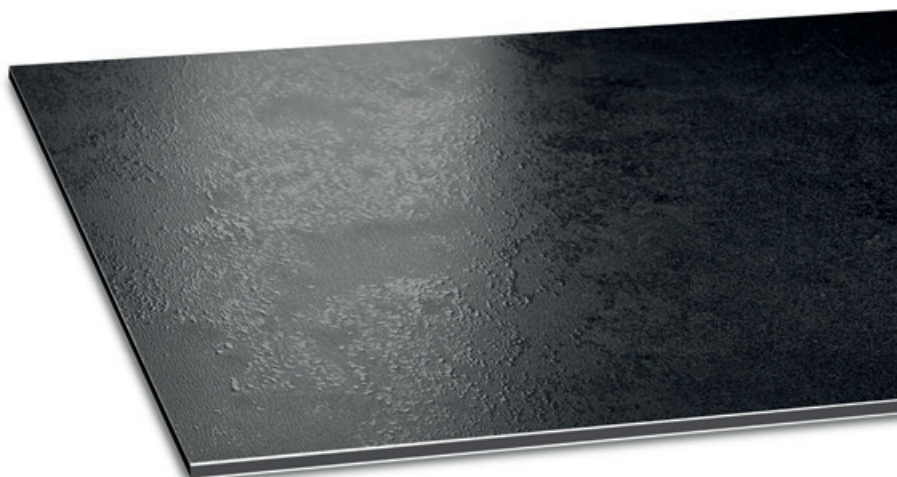

## HIGH-GLOSS

Thanks to the multi-layered lacquer structure, RenoDeco high-gloss decors provide an elegant look with depth effect and offer a discreet and stylish brilliance.

## TEXTURE

The decors with a textured surface bring a natural look to the bathroom. Thanks to their characteristic embossing, the high-quality surfaces are almost indistinguishable from natural materials such as stone, wood and metal.

## Versatile designs

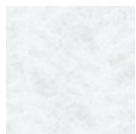

### Velvety silk-matt, elegant high-gloss, strikingly textured

Exclusive RenoDeco high-gloss decors bring brilliance to the individual dream bathroom. The multi-layered lacquer texture ensures a sophisticated lustre with depth effect. The high-quality textured surfaces are almost indistinguishable from natural materials. The silk-matt surfaces, which are velvety soft to the touch and offer a high-quality, matt look with a silky shimmer, add even more exclusivity to the bathroom. The customised print is highly expressive – velvety silk-matt, elegant high-gloss or strikingly textured.

## Everything in order

### Perfect connections with aluminium profiles

The RenoDeco creative wall cladding can be joined seamlessly and reliably using slim aluminium profiles – whether around corners or on the surface. The flush, angular or optionally rounded profile provides a neat panel finish. The 3D corner provides a professional finish for three surfaces on an external corner, as with a pre-wall installation.

### Profile colours

## Your holiday photo on RenoDeco

### Bathroom design with large-format personal memories

Would you like a bath with a view of the palm beach? Or would you like to shower in the middle of the forest? Be creative and give your bathroom an atmospheric flair. For example, bring the impressive Dolomites into your shower, which you photographed yourself on your last hiking trip. For optimum resolution, your favorite photo should not be smaller than 6000 x 4000 pixels (W x H).

Discover the entire picture format online in the RenoDeco configurator.

Just a few steps to your desired decor

This could be your decor panel. Select the motive, the image section and the surface.

Example format:  
100 x 255 cm

# HSK GOES GREEN

For the sake of the environment

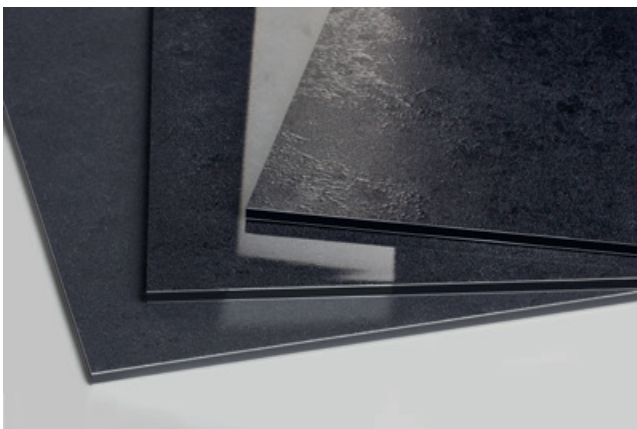

## How does RenoDeco contribute to sustainability?

With RenoDeco wall cladding, HSK has developed a product range that contributes to improving the environment. Because of the recyclability and durability of the materials, RenoDeco ensures a high level of sustainability. Thanks to the environmentally conscious packaging, harmful effects are reduced.

### The eco-friendly material

- 🌿 The RenoDeco wall cladding system is durable, resistant and easy to clean, which means it supports sustainable construction and renovation.
- 🌿 RenoDeco is made from 98 % recycled materials.
- 🌿 After use, i.e. at the end of the product life cycle, RenoDeco can also be recycled by 96 %.

- 🌿 All paints used are REACH and RoHS compliant and no heavy metals are used for their pigmentation.
- 🌿 To avoid wasting water, 100 % of the water used in the painting process is treated and purified.

### We pack sustainably

- 🌿 Styrofoam-free packaging with cardboard edge protection.
- 🌿 Use of paper adhesive tapes.
- 🌿 Corner protection caps made from 100 % recycled plastic and profile packaging made from 85 % recycled PCR film.
- 🌿 Reduction of packaging material and avoidance of unnecessary transport routes by bundling different items within one order.

**HSK is continuously working on optimising its production processes to improve its carbon footprint.**
